LITERATURE REVIEW

Turning Literature Screening into a Structured Digital Service Model

*How PharmaSoft transformed a routine pharmacovigilance function into a mature, platform-driven service through **PharmaSEARCH**, built for transparency, continuity, and client access.*

A Strategic Capability Since the Beginning

Literature screening has been one of PharmaSoft's core service areas since the company's earliest years. Rather than relying on manual follow-up models, PharmaSoft invested early in a dedicated digital solution tailored specifically to the needs of the pharmaceutical sector.

This gave the company a strong operational foundation, combining **service delivery** with its own **technology infrastructure** from the outset.

Literature Screening

Core service since inception

Service Delivery

Operational excellence in execution

Digital Solution

Dedicated pharma-tailored platform

Technology Infrastructure

In-house systems supporting services

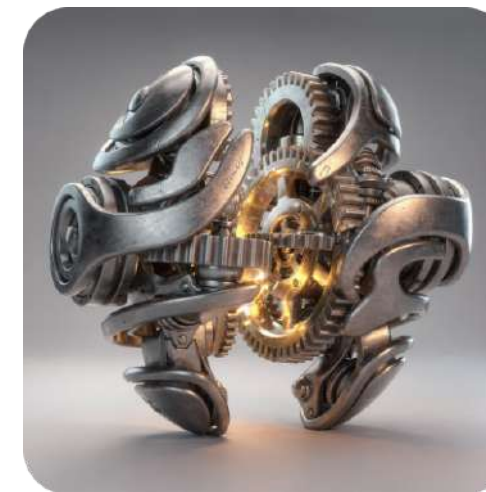

A Dual Advantage from Day One

PharmaSoft's unique approach to literature screening combines proprietary technology with evolving service quality, establishing a distinct market position.

Dedicated Technology Platform, PharmaSEARCH

By building its own bespoke platform, PharmaSEARCH, rather than adopting generic tools, PharmaSoft established a robust foundation for tailored solutions that precisely meet sector-specific needs.

Integrated Service & Tech Evolution

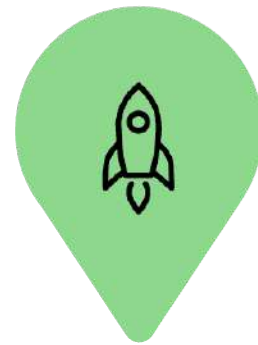

This proprietary approach allows service quality and technological advancements to evolve in tandem, creating a synergistic model that continuously enhances PharmaSoft's offering and client value.

From Automation to Certified Service Provider

2015 Launch

PharmaSEARCH begins to automate screening

Jan 2017 Certified

Achieves certified pharmacovigilance status

2015–2016 Scale

Screening becomes a major service line

Present

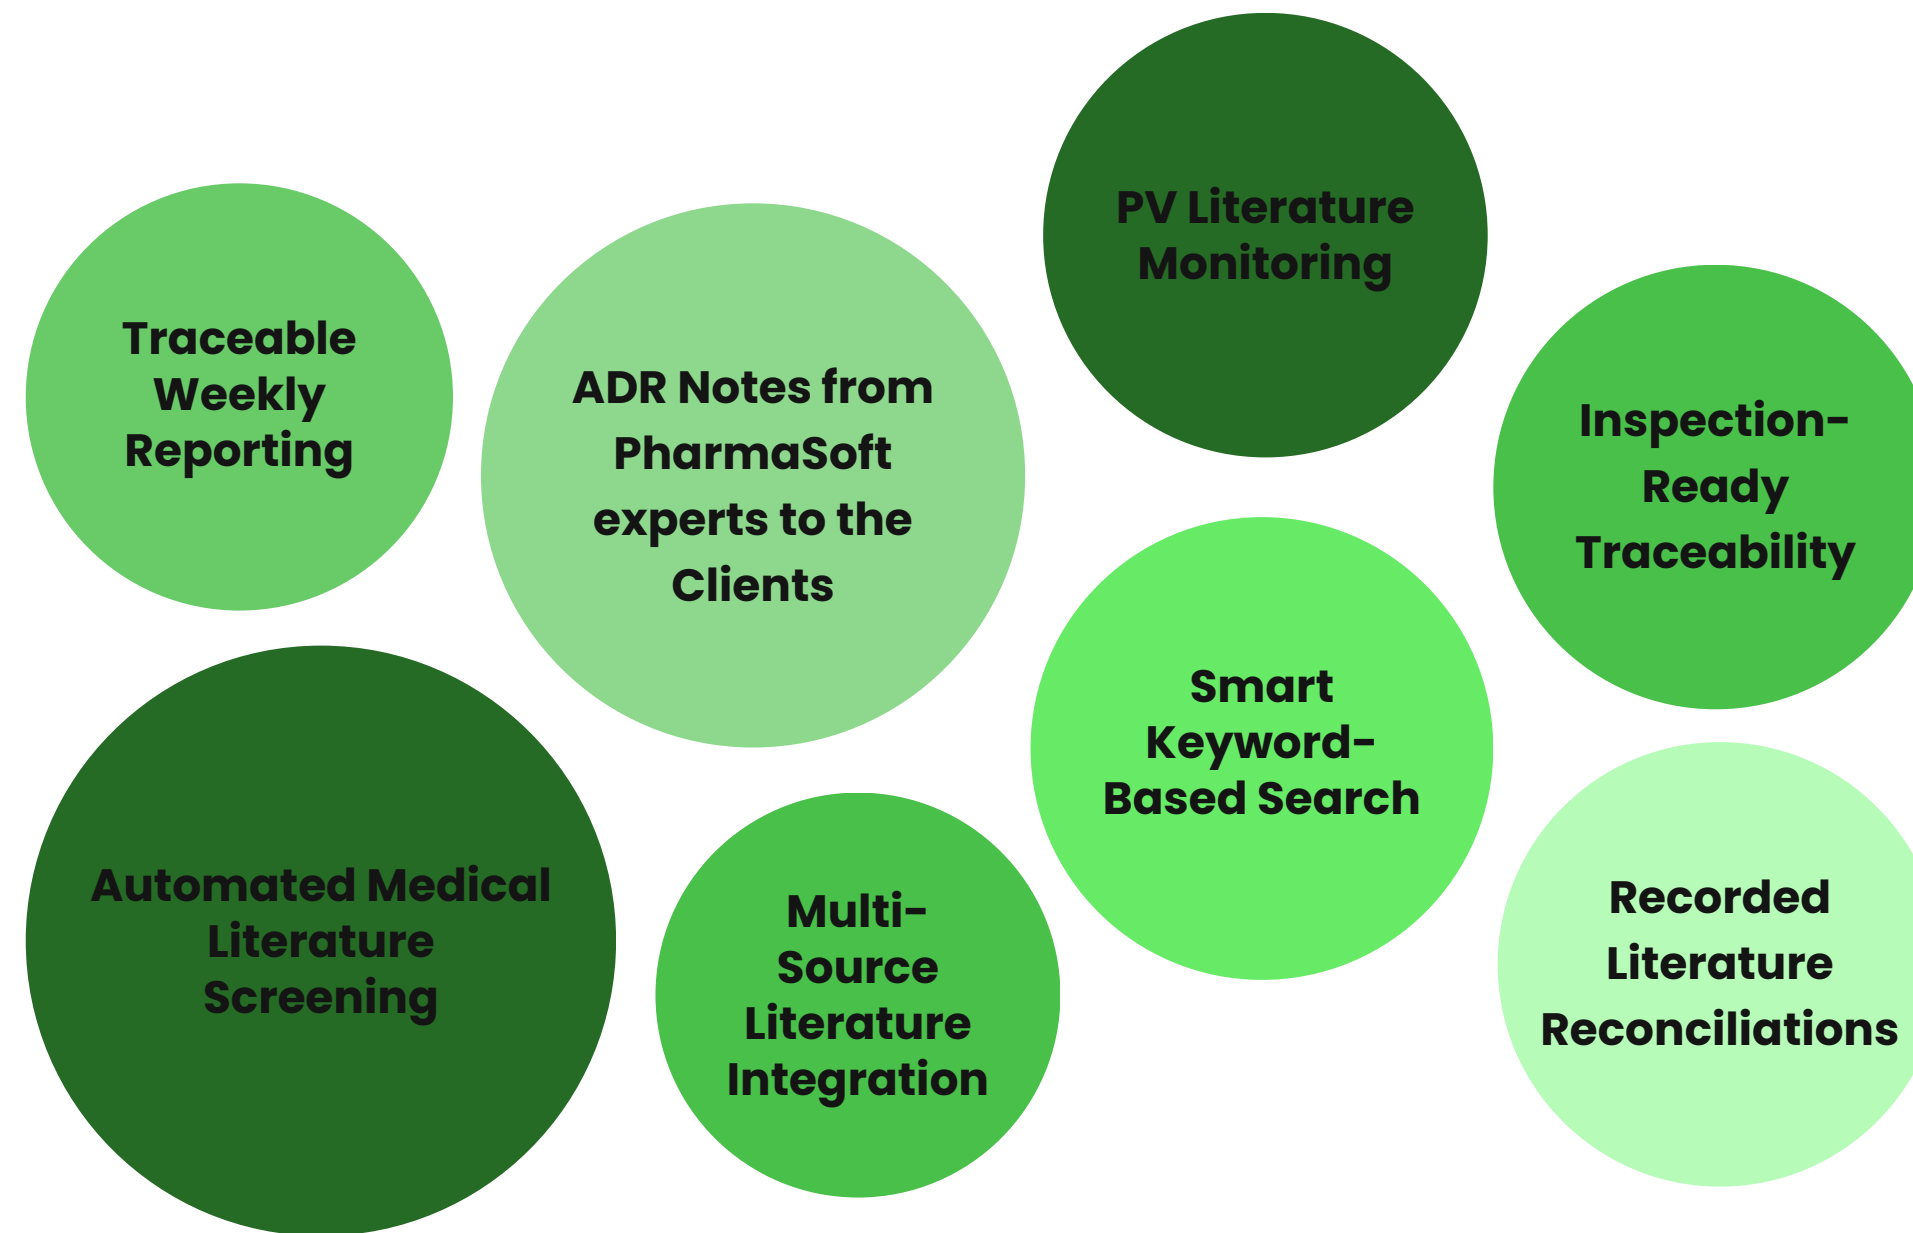

PharmaSEARCH is a mature, client platform

PharmaSEARCH: Built for the Sector

An in-house developed platform purpose-built for pharmaceutical literature screening, not a generic solution adapted after the fact.

Continuous Improvement Across Every Dimension

Journal Database

Expanded and continuously updated to reflect current screening requirements and evolving publication landscapes.

Screening Workflows

Strengthened structural processes ensuring consistency, defensibility, audit trail and regulatory alignment across all screening activities.

User Access

Improved client-side access and result visibility, enabling direct engagement with screening outcomes through a dedicated interface.

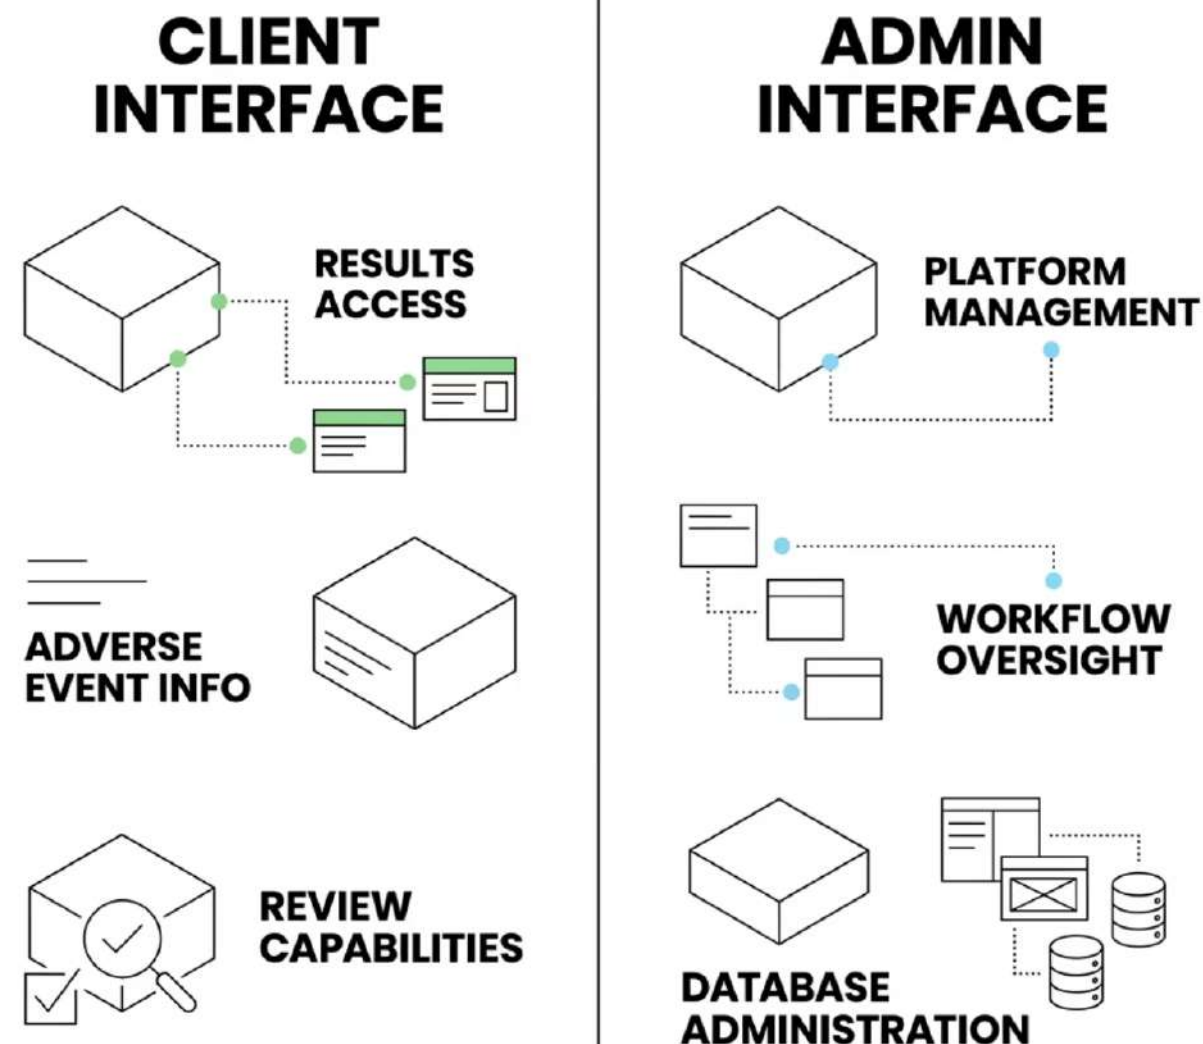

Review Transparency

A more structured and transparent review environment supports client confidence and operational oversight.

Separate Interfaces, Defined Roles

Designed Around Its Users

PharmaSEARCH operates with **separate client and admin interfaces**, ensuring each user group works within a structure precisely aligned to its responsibilities.

Clients access screening results directly, including **adverse event information notes** linked to relevant findings, without navigating administrative layers.

- ✓ Role-based architecture improves efficiency, accountability, and clarity for all user groups.

A Decade of Digital Screening Excellence

Since 2015, PharmaSoft has developed literature screening as both a service and a digital capability through PharmaSEARCH, a platform-based model built around automation, updated journal coverage, and direct client access to screening outcomes.

**Complex processes
need the right partner.**
